

Post conference Feedback - Yolanda Gil

Take a look at the ENCODE project report on how they organized hundreds of researchers towards a common science goal:

<http://www.nature.com/uidfinder/10.1038/489049a>

This speaks to me about successful governance structure of integrative science projects. Another great report to look at is the caBIG report on how \*not\* to do large projects.

I think sharing these lessons and bringing them to the forefront of the conversation would be very helpful!

Yolanda
